

WHAT IS CLAIMED IS:

1. A combined rack and containers comprising:  
a rack being in an L-shaped form and having a plurality of engagement mounts disposed thereon;  
5 a plurality of containers capable of being supported on said rack and each provided with an engagement recess disposed in a bottom thereof; and,  
whereby said plurality of containers can be securely held on said rack in place by making said engagement recesses of said containers  
10 respectively engaged with said engagement mounts of said rack.
2. The combined rack and containers as claimed in claim 1, wherein said rack is provided with a plurality of mounting keyholes disposed in a rear wall thereof so that said rack may be conveniently fastened to a wall.
- 15 3. The combined rack and containers as claimed in claim 1, wherein said rack is provided with a plurality of recessed holes disposed in an outside surface of a bottom thereof and each of said recessed holes is inserted with a non-slipping member securely therein so that said rack may be conveniently placed on a table top without slipping away.
- 20 4. The combined rack and containers as claimed in claim 1, wherein said plurality of engagement mounts of said rack are designed to be in an approximately semicircular form.
- 25 5. The combined rack and containers as claimed in claim 2, wherein suction cups are capable of being connected with said mounting keyholes of said rear wall of said rack for attaching to smooth surfaces so that said rack may be conveniently fastened to smooth surfaces.
